

# Locking and Collapsing Areas

**Don't ditch your spreadsheet: but if you want an effective way to progress, document and communicate engineering projects, you need Mathcad on your desktop too.**

Most of us these days have PCs with Microsoft Office pre-installed, and good compatibility with the Office programs - a significant benefit of Mathcad - is a great aid to productivity. The Microsoft Excel spreadsheet application is very capable and flexible, and is widely used by engineers and just about everyone else who needs to perform calculations and handle data.
